 - Mainframe and structural design
 - Hydraulic power unit (HPU), Telescopic arms and gripping jaws
 - Cable management and safety chains
 - Remote control system (wired or wireless)
 - Mounting arrangement on aerial platforms/cranes
 - Counterbalance systems and stabilizers
 - Pre-Operation Checks and Preparations
 - Visual inspection for cracks, oil leaks, structural integrity
 - Hydraulic hoses, fittings, pressure gauges
 - Gripper alignment and jaw function
 - Safety Practices and Procedures
 - Operational Techniques including positioning, alignment and Centering the extractor.
 - Operating the hydraulic controls for gripping and extraction
 - Monitoring hydraulic pressure, Pulling bundles in a controlled and steady manner
 - Understanding various forces including torsional
 - Aligning bundle for reinsertion
 - Remote Control Operations
- Course Code - 756
 - Duration - 5 Days
 - Knowledge level - Advance
 - Category - OSHA & Industrial Safety
 - Offline/ Client Site

What does this course Covers?

- Communication, Signals, Coordination and Teamwork
- Post-Operation Procedures including Safe disengagement of extractor, Bundle support and securing
- Cleaning and stowing equipment and Hydraulic system shut down
- Post-use inspection, reporting faults & maintenance log entries
- Troubleshooting and Common Issues
- Documentation and Record Keeping
