What does this course Covers?

- Basic knowledge of Liquefied Gas Tankers
 - Types of Liquefied Gas Tankers
 - General arrangement and construction
 - Basic knowledge of physical properties of LPG
 - Pressure and temperature including vapour pressure/ temperature relationship
 - Types of electrostatic charge generation
 - Basic knowledge of hazards associated with tanker operations including health, environment, reactivity, corrosion and explosion hazards
 - Sources of ignition, explosion and flammability hazards. Toxicity, vapour leakage, pressure and low temp hazards
 - Basic knowledge of first aid with ref to SDS
 - Basic knowledge of safe working practices and procedures relevant to liquefied gas tankers
 - Preaution to be taken when entering enclosed spaces and carrying out repairs and maintenance
 - Safety measures for hot, cold and electrical work
 - Emergency shut down system
 - Loading, unloading and care in transit
 - Fire safety, fire fighting, fire fighting agents, organisation and action to take
 - Special hazards associated with with cargo handling and transport
 - Spill containment and emergency procedures
 - Basic knowledge of procedures for prevention of pollution and effect of pollution on human and marine life
- Course Code - 127
 - Duration - 4 Day
 - Knowledge level - Beginner
 - Category - Port and Marine
 - Offline/ Client Site
